Our objective is to build bridges to prevent and resolve water-related conflicts and to promote the use of water as an instrument of peace.

The situation in the Gaza Strip is reminiscent of a water tower in Gaza was allegedly detonated by the Israeli military forces. It is clear that the destruction of this infrastructure is part of a broader strategy to deprive Gaza’s population of access to water and sanitation services.

Combatants must respect humanitarian law. Humanitarian assistance must be provided without delay. From a water perspective, we join the ever-growing chorus of calls for a ceasefire to restore the dignity of the people in Gaza, and to allow the reconstruction and rehabilitation work to proceed. The norms that the world has built to preserve humanity can be used to open the door to negotiations on an enduring solution to the conflict.

Let us use water to extinguish the flames, instead. The killing must stop. What we do know is that there is an ample body of international law meant to prevent and mitigate water-related activities’ impact on the affected communities. It is particularly relevant when a water tower was exploded in Gaza.

The situation in the Gaza Strip is reminiscent of the destruction of a water tower in Gaza was allegedly detonated by the Israeli military forces. It is clear that the destruction of this infrastructure is part of a broader strategy to deprive Gaza’s population of access to water and sanitation services. The aquifer has been under pressure ever since, despite decades of efforts by the occupying power, the Israeli military, to בשם ומקנין. The Israeli military has been using this infrastructure as a strategic asset to control and subdue the civilian population.
Seized by the ILO, the International Court of Justice will rule on the right to strike. Why did China and Russia oppose the move?
